manuel.latorre11@gmail.com

I have experience in the development of various types of applications, including websites and data management platforms. My focus is on creating technology solutions that improve efficiency and user experience. I currently work at [Tualo](#) and also as a Freelance.

EXPERIENCE

Tualo - México

May 2024 – Actual

Fullstack Developer

Remote

Tualo is a company that is dedicated to financial advice, which generates monthly financial reports with AI, graphs suitable for the client and more.

My Responsibilities

I handle various essential tasks, including the design and development of the user interface for the entire platform. This involves creating a visually appealing and easy-to-navigate environment that enhances the user experience.

I perform complex interactions with the database to enable different site functionalities, ensuring that information is managed and presented efficiently.

Additionally, I have integrated forms that allow the upload of various file types, such as images and PDF documents, making it easier for users to incorporate and manage important documents.

Technology stack

Typescript, Next Js, Tailwind css, Node Js, Supabase, Open AI.

Diarc Studio - Argentina

April 2024 – May 2024

Freelance

I have developed this website for Diarc Studio, a 3D Art Outsourcing studio focused on the development of Immersive Experiences, Metaverses and Gaming.

The Portfolio section is where the company's projects are displayed. For this I integrated an administrator system with technologies such as Mongo DB to store the projects in the database and Cloudinary for hosting multimedia files. In this you can add, edit and delete projects.

My Biggest Challenges

Successfully implementing the client's ideas.

Creating effects and transitions, such as those seen on the Home page.

Integrating a CRUD system for managing the company's portfolio.

Technology stack

Typescript, Next Js, Tailwind css, Node Js, Cloudinary, Express, MongoDB.

Tu Mejor Amigo - México

Novemeber 2023 – March 2024

Frontend Developer

Remote

I have significantly contributed to the development of an innovative dog-walking service application, focusing on creating intuitive and attractive user interfaces. My work has encompassed implementing essential data management functionalities using GET, POST, PUT, and DELETE requests, ensuring smooth interaction with the application's database.

My Biggest Challenges

Integrating an effective notification system using React Native Firebase Cloud Messaging.

Adding functionality that allowed users to upload images of their pets and profile pictures via Cloudinary.

Managing the application's launch on Google Play Console, ensuring accessibility for dog enthusiasts seeking reliable walkers.

Technology stack

Typescript, React Native, Firebase Cloud Messaging, Cloudinary.

TECHNOLOGIES AND TOOLS

HTML, CSS, Tailwind css, Javascript, Typescript, React, Next Js, Redux, Node Js, Express, MongoDB, Supabase, PostgreSQL, Slack, Trello, Canva
